- Supported Migration projects as a Business Analyst and Developer role.

## Experience

---

### Wipro .,Hyderabad—Power BI Developer

MAR2019-To Till Date.

#### PROJECTS PROFILE:

##### *Project #1*

Title : GRIP Power BI Project  
Client : Bharat Petroleum Corporation Limited (BPCL).  
Role : Senior Power Bi Developer

#### Project Overview

The main Purpose of this project ZERO OVERDUE ACTIONS culture in the refinery. This tool provides a comprehensive list of tasks/ Action Items for applications used in each refinery. This tool has a capability to slice and dice the data at various dimensions like Department/ Unit/ Complex etc. to find total actions present. Data for this is coming from various applications associated with each refinery. All this data is transformed as per the business needs and loaded into the enriched layer for Visualization tools to consume as source feed.

#### Responsibilities:

- Understanding existing Tableau reports logic & business logic and working with TOP Level Management
- Creating and implement Data Model and Power BI reports as per Tableau reports logic.
- Resolved performance issues of the Reports.
- Extensively worked on Dax Calculations part and used extensively power query.
- Creating workspace as per the business requirement and creating gateways and scheduling daily refresh.
- Providing access for workspace and app level to the admin and dev team to load the files in different instances.
- Worked on migration from Tableau to Power Bi.
- Resolved tableau production support tickets which were in backlog state for 3 months due to migration.
- Have explored new tool and gained good knowledge on Tableau.
- Gained knowledge on Power Apps integration.
- Implemented DAX functions for Calculated columns and measures
- Designed power BI data visualization utilizing, maps, scatter plots
- End to end process to deliver the project
- Optimize the performance of these reports in terms of time to refresh and size of the reports.
- Able to work independently to implement a solution with minimal guidance.
- Delivered app services and solutions using the suite of Microsoft's Power Apps, Power BI, and Power Automate and data integrations on the platform.
- Cleansed the data and normalized data using ADF.
- Implemented ETL, Pipelines, data flows, transformation in Azure Data Factory.
- Connected with Azure SQL and Azure Lake Storage to enhance power bi reports
- Managing stakeholders to support various projects and solutions.
- Developing Power Apps model and canvas driven apps

#### ▪ PROJECTS PROFILE:

##### *Project #2*

Title : Insight Centre (Spend Management Data Analysis)  
Client : Crompton Greaves Consumer Electricls Ltd  
Organization : Wipro Technology, Hyderabad.  
Role : Senior Power Bi Developer (SME/Consultant)

Developed Insight Centre Landing page/Designed as per the User Interface and comments by UX designer. Category wise development of the Power Bi reports as per the spend analysis. Level based access implemented using Row Level Security. Created different versions of home pages for better appearance (Look and Feel).

#### Responsibilities:

- Created Bookmarks/Page Navigations as per the requirement.
- Created Paginated reports
- Provided Power BI training to Clients for their good understanding of the report.
- Creating workspace as per the business requirement and creating gateways and scheduling daily refresh.

- Providing access for workspace and app level to the admin and dev team to load the files in different instances.
- Attended client calls for better understanding on the requirement.
- Implemented KPI's in Power BI dashboards.
- Gained knowledge on Power Apps integration & Power Automate.
- Implemented DAX functions for Calculated columns and measures
- Designed power BI data visualization utilizing, maps, scatter plots
- End to end process to deliver the project
- Optimize the performance of these reports in terms of time to refresh and size of the reports.
- Able to work independently to implement a solution with minimal guidance.
- Learned and implemented small project on Power Automation.
- Implemented RLS (Row Level Security)
- Organized business data into cloud services.
- Migrated on premises data to Azure Storage/Azure Lake Storage
- Implemented Azure Services along with data engineers
- Implement custom solutions that leverage various Power Tools
- Experience dealing with Dataverse, offline app development and data management on prem
- Data Connection with Azure Synapse server & later migrated to Azure Synapse Serverless.
- Used visual charts like Donut chart, Bar chart, Pareto chart and few other new charts from Microsoft Certified.
- Received Feedback from customer on the implementations and changes are done accordingly.

## **PROFESSIONAL SKILLS**

---

- |                      |                  |
|----------------------|------------------|
| • Power bi           | • power Apps     |
| • MYSQL              | • Power Automate |
| • Azure Data Factory | • MS-Excel       |
